

CAREER OPPORTUNITY National Starch LLC

Job Title: Chemist
Group: Plant Genetics Group
Location: Indianapolis, Indiana

National Starch is a world-leader in specialty starches and other nature-based ingredients. You may not know us by name, but you almost certainly encounter our products every day in many types of foods and beverages and a wide range of consumer products. Our customers include major players in industry, including not only the world's largest food companies but also the most creative and dynamic. Because we produce specialties, we have a continuing drive for innovation and an intimate knowledge of our markets. That means that we value creativity, technical competence, diverse thinking and an entrepreneurial spirit.

Position Description:

The Chemist will be responsible for laboratory support of the plant breeding program. While this is a regional role, the Indianapolis laboratory provides technical support for grain and starch issues in all regions. Laboratory support will include:

- Maintenance and upkeep of laboratory instrumentation
- Instrumental analysis of grain and starch samples
- Amylose analysis (colorimetric & potentiometric)
- Laboratory wet milling of developmental hybrids
- RVA operation
- TDF analysis

Requirements:

- BS degree in Chemistry or related science program, such as Biology, with significant course work or a minor in Chemistry. Agricultural background is a plus.
 - Ability to execute laboratory analyses in support of field research projects.
 - Supervision of part time labor when necessary.
 - Ability to interact with Plant Genetics research teams, others within National Starch, and with National Starch service providers.
 - Strong computer skills in Microsoft Office Suite.
 - Strong interpersonal and communications skills and experience working in a technically-driven and cross-functional environment.
-
